Map Description

This map shows work that is taking place during the winter of 2012-2013. There are currently two vertical oil wells completing flow tests within Husky's area. These previously constructed sites are labeled as "Existing" and coloured grey. The purpose of the water monitoring wells is to gather groundwater baseline data. Husky is building an all season road, between points 'A' and 'B', in order to operate year round.

Projection: NWT Lambert Conformal Conic
Datum: NAD 83
Central Meridian: -112.00
Standard Parallels: 62.70
Data Scale: 1:250,000
